

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 9, 2010 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (141 new fires)
 New large fires: 0 (*)
 Large fires contained: 3
 Uncontained large fires: ** 6
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 2
 Type 2 IMTs committed: 2

Nationally, there are 77 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy. **

Rocky Mountain Area (PL 3)

New fires: 7
 New large fires: 0
 Uncontained large fires: 2
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 1

Fourmile Canyon, Boulder County. Transition from IMT 2 (Richardson) to IMT 1 (Thomas) will occur today. Twelve miles northwest of Boulder, CO. Timber. Moderate fire activity with single tree torching. Residences threatened. Road closures and evacuations in effect.

Illinois Creek, Medicine Bow NF. Three miles west of Fox Park, WY. Lodgepole pine and grass. Creeping and smoldering with isolated torching. Numerous structures threatened.

PAS - Pennsylvania Division of Forest Fire Protection

Predictive Services Discussion: Significant fire potential is forecast today for portions of Colorado, Wyoming and the Four Corners area due to strong, gusty winds. Elsewhere, cool and showery weather is expected from the Cascades east into Montana and western Wyoming. Portions of the Mid-Atlantic States will have gusty winds and low humidity.

**Today's discussion is from the
Fireline Safety Category.**

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

- Most incidents happen on smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.
- Some suppression tools, such as helicopters or airtankers, can adversely affect fire behavior. The blasts of air from low-flying helicopters and airtankers have been known to cause flare-ups.
